

**Annotations of Doctoral Thesis Topics for Degree Course in
„Biomaterials and Biocomposites“
for the Academic Year 2017/2018**

Topic: Preparation of Higly Functional Antibacterial Surfaces

Tutor: doc. Ing. Marián Lehocký, Ph.D.

Consultant: –

E-mail: lehocky@post.cz

Annotation:

The aim of this work will be preparation of materials with active surfaces, which will be antibacterial. Surfaces will be prepared via multistep synthesis. Antibacterial agent will be anchored to such prepared surfaces. Prepared samples will be subjected to analysis of the interaction with bacterial systems.

Requirements:

Knowledge of general and macromolecular chemistry and physics at the university level. Good knowledge of the English language or a potential to the improvement. Basic manual and laboratory work skills. Ability to work independently.
