

**Annotations of Doctoral Thesis Topics for Degree Course in
„Nanotechnology and Advanced Materials“
for the Academic Year 2017/2018**

Topic: Preparation and characterization of nanocomposite thin films for polymer electronics

Tutor: doc. Ing. et Ing. Ivo Kuřitka, Ph.D. et Ph. D.

Consultant: –

E-mail: kuritka@cps.utb.cz

Annotation:

The work will be focused on preparation of thin films from conductive and semi-conductive polymers doped by addition of nanoparticles with the aim of modification of electronic properties of obtained thin films. Electronic devices will be prepared from these materials and will be tested by spectroscopic and electric measurement methods available at the TBU.

Requirements:

Knowledge of general and macromolecular chemistry and physics at the university level. Good knowledge of the English language or a potential to the improvement. Basic manual and laboratory work skills. Ability to work independently.
